

AMUT PARTNER OF THE ITALIAN TECHNOLOGY AWARDS PROJECT

“We are very glad to open the door to international worthy students and sharing our company reality to them. We’re always content to help to reduce the gap between university study-experience and practical manufacturing trial” – says Mr Roberto Donatelli, Area Sales Manager of AMUT GROUP, during the visit of the winners students of the Italian Technology Awards.

This is a promotional project organized by ICE-Agency in

cooperation with FEDERMACCHINE, the Italian University Carlo Cattaneo of Castellanza LIUC and ASSOCOMAPLAST consisting in rewarding with an educational training those students who are working on innovative papers specifically regarding plastic materials processing technologies. AMUT

was included in the project as example of Italian excellence in the machines manufacturing.

“The distinguished students from the Russian University of Kazan and the Mexican UPAEP Puebla University, are really well-prepared on the subject and particularly interested in R&D activities, mechanical aspects, living the real part of the production process”– continues Mr. Donatelli.

The programme includes the visit at several companies involved in

the plastics field together with some classroom lessons focused on the latest engineering developments.
